Add New

New feature to store so called "Standard Text". Having such a Standard Text stored like in this example the text for the code "COL", you can apply that in various free-text-fields in the system using the question-mark-character ? followed by that code. Then, when tabbing out of that free-text field, the system auto-populates it with the respective standard text.

This feature is currently available in following free-text fields:

Booking Mask:

- OSI 1 & 2
- SSR 1 & 2
- "Dispo & Trucking Info"

Dispo-Overview when generating Manifests inside the free-text-field of the Options-tab
